Given Insightful Enlightenment,  
For Your Better Decisions

**Data Sheet.**

# Dients Platform Business Intelligence

## Overview

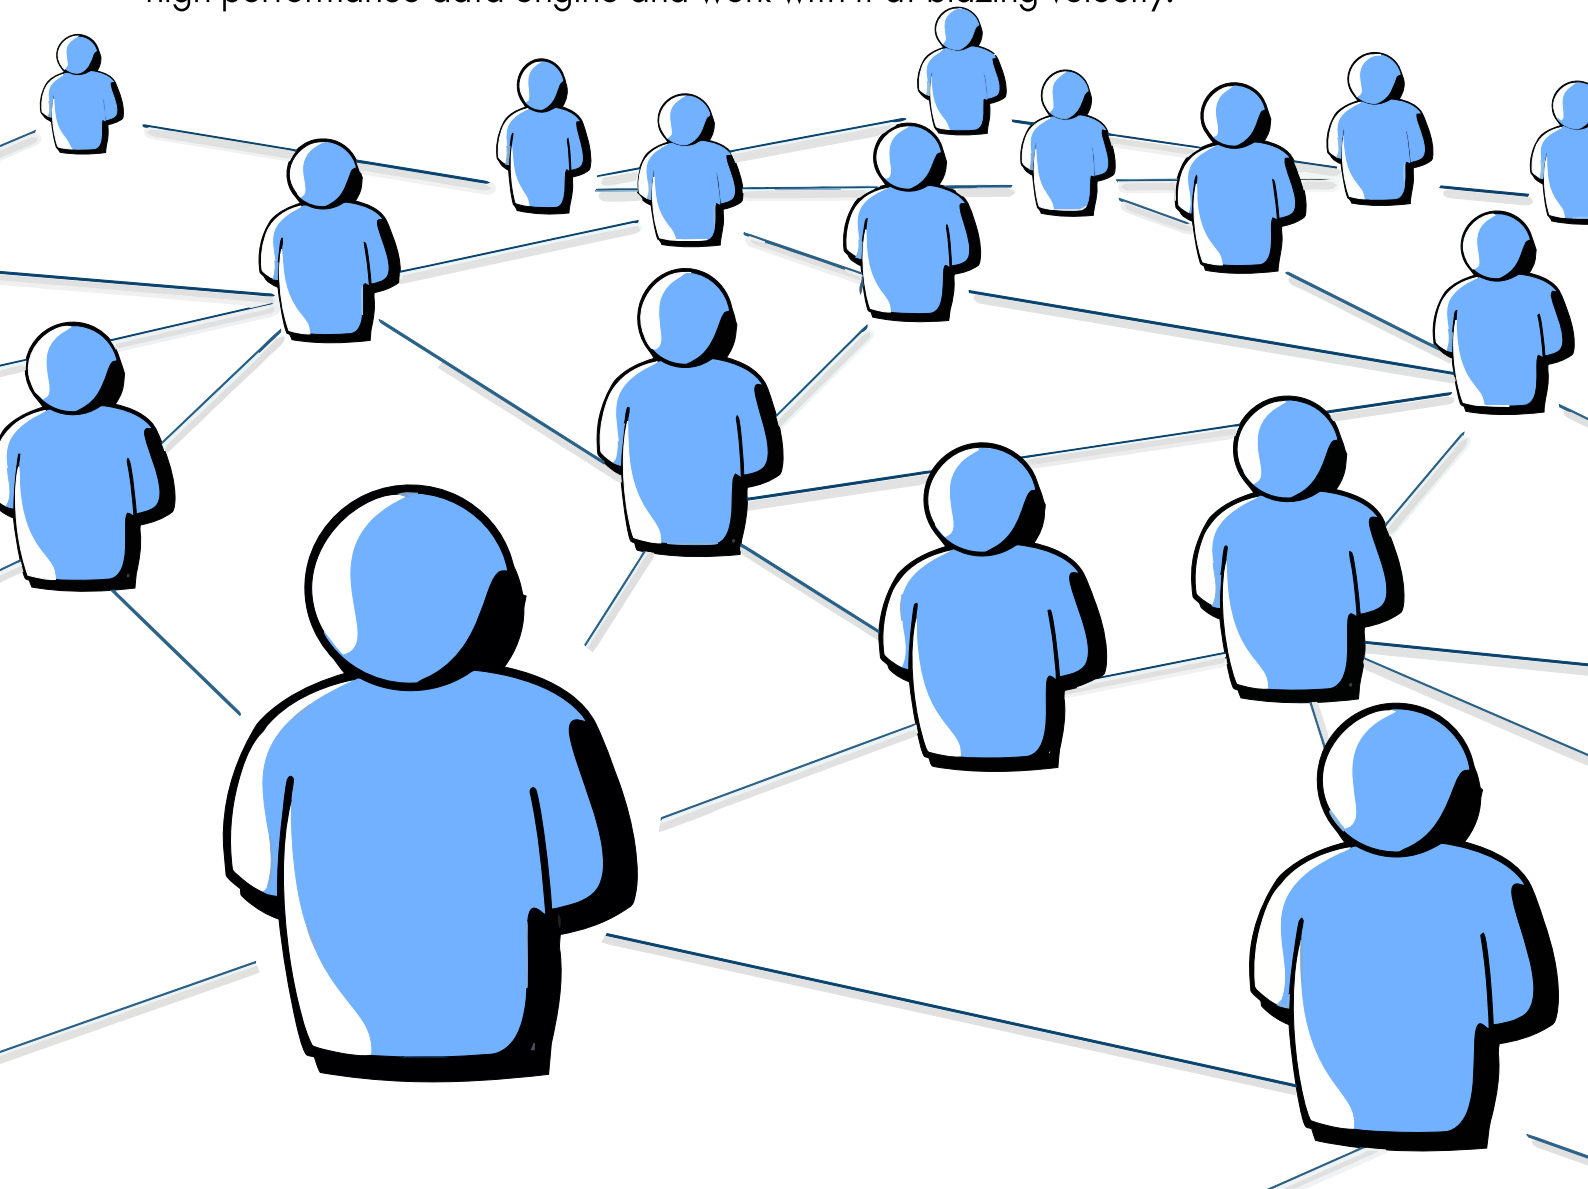

Dients Platform Business Intelligence allows client to combine data and information into a powerful dashboard. Features filter, highlight and drill down right in a Dients Platform. Embed and share through your team's workspace, or send it out via email. Update data in real time.

## Self-service business intelligence

Dients Platform Business Intelligence allows self-service business intelligence that is the most effective kind. Business users and stakeholders can create the reports they need to get answers themselves. They can change those data reports as things change. Business users also can get back to their business and IT can get back to strategic IT.

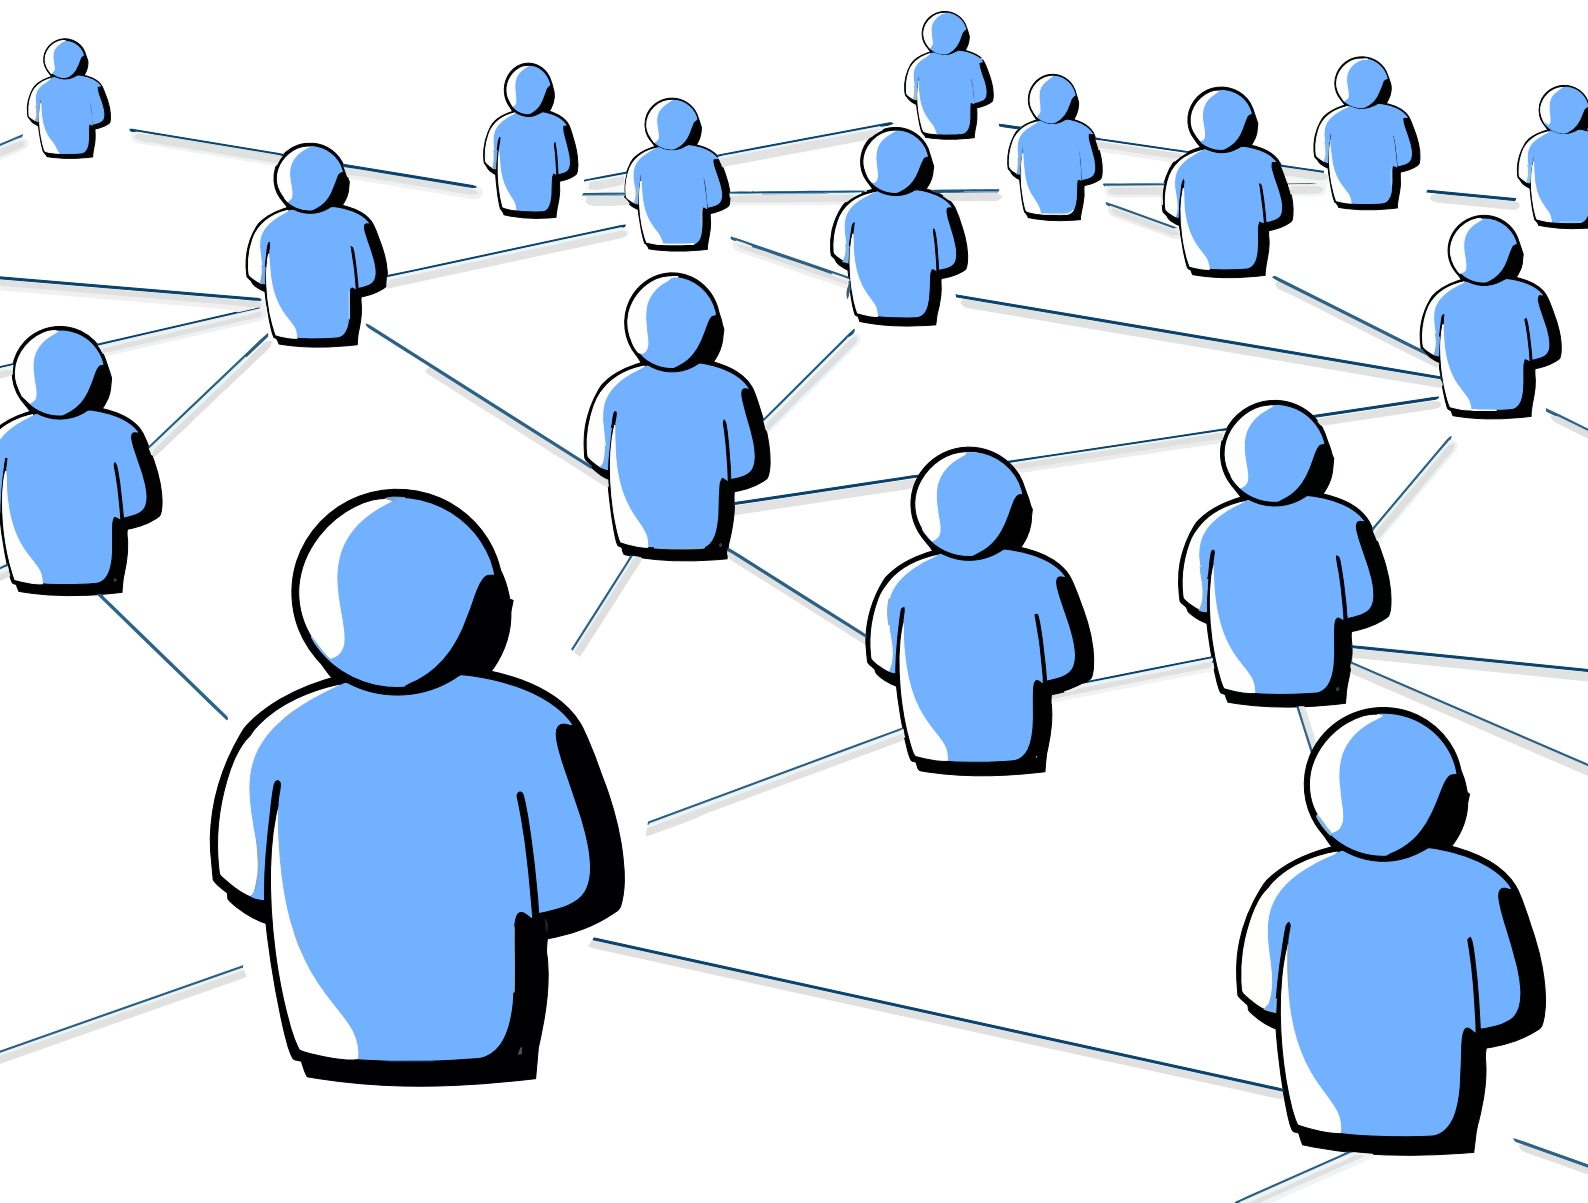

## Blazing velocity against massive data

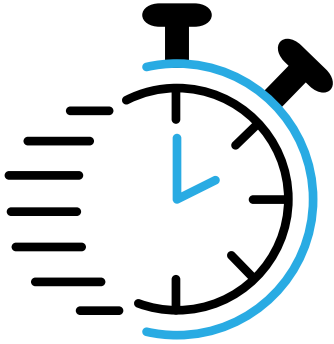

Our platform could turned your dashboard needs into the equivalent worth of a million dollar database. Bring your data into Dients Platform Business Intelligence high performance data engine and work with it at blazing velocity.

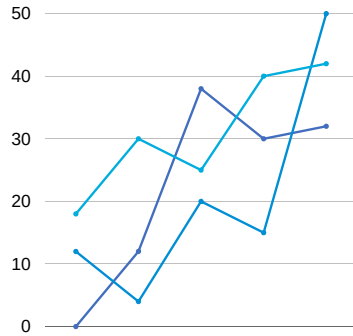

- Using Visual Query Language, make complex query language looks easy by drag and drop.
- Dients can display information in graphical form and combined into a dashboard, making it easier for users to understand information comprehensively.
- Dients has the ability to connect to almost any data source with a complete data source connector driver, such as File Based Data Source, Relation Data Source, OLAP Data Source, Cloud Based data source.
- With visual analytics, Dients can build new insights from data quickly and accurately.
