LIBRAINVENTA - MOBILE

# MOBILE BOOK INVENTORY SYSTEM

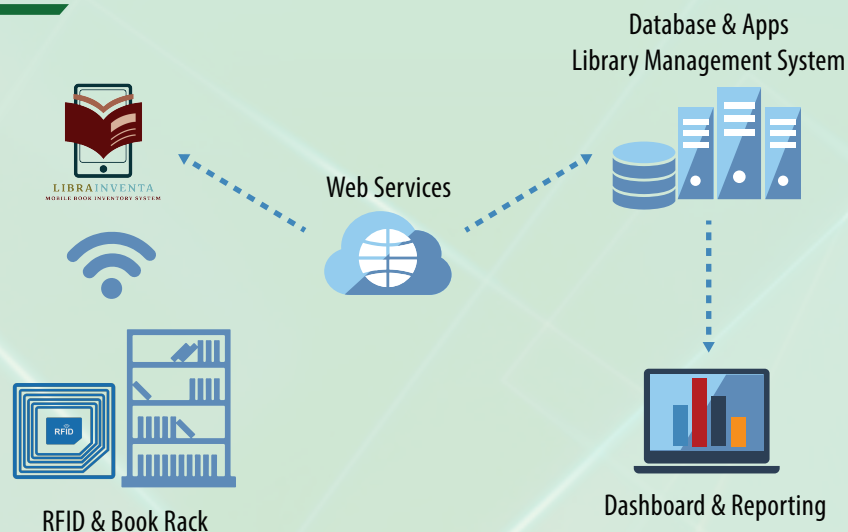

LIBRAINVENTA - MOBILE

# MOBILE BOOK INVENTORY SYSTEM

## Overview

- Write/Read RFID
- Error Position
- Time Setup
- Recap
- Data Export
- Integrtion
- Report

## Features

### Write and Read RFID

Can read RFID TAG on library books and can also be used to rewrite the existing code on the RFID TAG that is on library books.

### Position Error

Make it easy to find the wrong location of the book, users can simply scan the bookshelf and if there are books in an improper location the system will give a warning in the form of sound and popups on the application.

### Inventory Time Setup

Determine inventory time, Weekly, Monthly, 6 Monthly and Yearly. Get statistical information Library data collection from time to time, see the trend of library collections visually to make it easier to determine the addition of library collections.

### Inventory Data Recap

The system generates data in the form of a recap making it easier for users to see the number of collections of books available in the library, data recap can be determined based on the category of collection, year of publication, author, classification and other. Recap data can be directly printed or exported in the form of Excel.

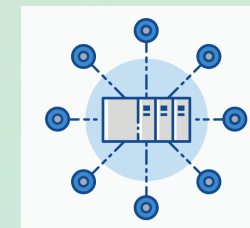

### Inventory Export Data

Data can be exported in the form of other data making it easier if needed as material for reports, data can be exported in the form of Excel, CSV and PDF.

### Inventory Data Integration

Inventory data can be integrated with other systems so that they can find out the details of the scanned collection, integration can be in the form of webservice (json, xml)

### Inventory Data Reporting

The system has data reporting facilities which can be printed directly. Data reports are displayed in tabular form and in graphical form.
