

# ProctorWatch: Elevating Assignment Security

*Secure your assessments with ProctorWatch, an advanced Assignment Security System integrated into your organization's comprehensive Integrated Assessment and Data Repository. ProctorWatch ensures the integrity of your evaluations through cutting-edge modules designed to detect and prevent unauthorized activities during assessments.*

## **1. Noise Detection**

Ensure a distraction-free assessment environment with ProctorWatch's Noise Detection module. This feature utilizes advanced algorithms to identify and flag any unusual noise levels, ensuring a focused and controlled testing environment. By mitigating external disturbances, Noise Detection promotes fairness and accuracy in assessment results.

## **2. Object Detection**

Safeguard the integrity of assessments with ProctorWatch's Object Detection module. Utilizing sophisticated technology, this feature identifies and alerts proctors to any unauthorized objects in the test environment. By preventing the presence of unauthorized materials, Object Detection enhances the credibility and reliability of assessment outcomes.

## **3. Browser Lockdown**

Maintain a secure online testing environment with ProctorWatch's Browser Lockdown module. This feature restricts candidates from accessing unauthorized websites or applications during assessments, ensuring the integrity and fairness of the evaluation process. By locking down the browser, ProctorWatch minimizes the risk of cheating and unauthorized assistance, reinforcing the reliability of assessment results.

*ProctorWatch is your partner in upholding the highest standards of security and integrity in assessments. Elevate your evaluation process with ProctorWatch – where security meets excellence.*
